

LICENSE RENEWAL NOTICE

The Iowa DNR hereby extends all Underground Storage Tank installer, tester, liner, and install inspector licenses until an 8-hour training/refresher course can be implemented (approx. June 2008). Specific details will be posted on this website.

We are also currently working on a training course to be held sometime this March 2008 for **persons wishing to become Iowa licensed Underground Storage Tank installers**. A written UST Installer exam will follow this initial training class.

Please contact Program Coordinator Tom Collins (515/281-8879) if you have further questions.
