FORM FOR REGULATORY ACTION DESCRIPTION**

**Rule Making Authority**      Director   
Environmental Protection Commission (EPC)   
Natural Resource Commission (NRC)   
Energy & Geological Resource Division

**Title of Regulatory Action** General permit for regulating swimming pools

**Rule Chapter(s) that may be involved** 567 Chapter 64

**Description of Contemplated Regulatory Action**

(Including, to the extent reasonable and practicable, alternatives to be considered and preliminary estimate of costs and benefits of the Action)

This rulemaking action is intended to issue a National Pollutant Discharge Elimination System (NPDES) General Permit for swimming pools

Costs: Any costs to regulated parties would be minimal as they are currently required to apply for individual permits.

Benefits: The general permit will reduce the amount of information required in a permit application. This will make it easier for permittees, the majority of which are private home owners, to obtain permit coverage. The department benefits from reduced staff time needed to process the permits.

**Legal Basis**

(Include whether action is required by statute or court order)

Iowa Code subsection 455B.173

**Need for Regulatory Action**

(Include if applicable how the action will reduce risk to public health, safety, or the environment)

This rulemaking action is intended to provide adequate protection for both human health and aquatic life by following and interpreting the Clean Water Act, Federal Code of Regulations, and Iowa Codes. Simplifying the process for these permittees will result in better compliance and better water quality protection.
