

**IOWA DEPARTMENT OF NATURAL RESOURCES
AMENDMENT #3**

Issued by: _____
Michael Leat
Environmental Services Division

For: the Director

Date Issued:

Permit number 27-SDP-01-75P, issued on June 15, 2006, for the Wayne-Ringgold-Decatur County Sanitary Landfill is hereby amended by the following:

1. The Settlement Calculations report, dated January 22, 2008, as submitted by Barker Lemar Engineering Consultants, is hereby approved and incorporated into the permit.

The report included total settlement calculations for the foundation layer within the Lateral Expansion Area. The same calculations were performed for the Piggyback Area, including waste settlement calculations, but excluding differential settlement in the waste due to large voids.

2. The Quality Control and Assurance (QC&A) Program (Revised #2), dated March 31, 2008, also submitted by Barker Lemar Engineering Consultants, is also approved and incorporated into the permit.
3. The Request for Approval to Construct Phase 2, dated February 5, 2008, as modified in accordance with the Phase 2 Plan Sheet revisions, dated April 18, 2008, both submitted by Barker Lemar Engineering Consultants, is hereby incorporated as part of the permit documents and the permit holder is authorized to construct the Phase 2 cell.

Any further expansion beyond this area shall require Department approval. No waste disposal shall commence in Phase 2 until the final construction certification has been submitted in accordance with paragraph 113.7(6)"d", and the cell has been inspected and approved by the Department.
